Swedish-Canadian Dermatology Association
P.O. Box 21 Nun's Island
Montreal H3E1J8, Canada

Dear Sirs:

As a member of the American Academy of Dermatology, and a member of the Atlantic Dermatological Society, I had the pleasure of attending the last meeting in Montreal starting May 11th.

I also had the opportunity of listening to the Romanian contribution given by the respective speakers for a new approach to the treatment of Lupus and Psoriasis, and Ichthyosis.

My colleagues and I were very impressed with the results of the therapy, but we were very chagrined, and some of us were quite annoyed at the fact that the treatment was not forthcoming to us, and all that was said is that it was the Kozak Therapy.

As a member of the Atlantic Dermatologic Society, I should like to know why this Romanian contribution having the merit that it may have was not completely open and honest in their presentation to us when they were specifically asked about the therapy, and said that they could not divulge it at this time.

Since you seem to think that the results were quite impressive and superlative, I should like to understand how you arrived at this conclusion.

I would deeply appreciate hearing from you, and await your further comments.

Very sincerely yours,

Neville Kirsch

REVITA-KLINIK
z.Hd. Herrn Pavel KOZAK
HOMBURG(Saar)

Durch eine Veröffentlichung in der Zeitung, erfuhr ich von der Forschungsarbeit des Herrn KOZAK und dem Erfolg davon bei schweren Ekzemen, der Psoriasis etc..
Ich als Arzt und meine Frau als Kosmetikerin, interessieren sich sehr dafür und bitten um Berichte und die Möglichkeit sich mit den vorgeschlagenen Behandlungsformen vertraut zu machen.
Wir wären Ihnen dankbar uns mitzuteilen wo und wann wir uns unterweisen lassen können für die spezielle Diät, Salben und Medikamente. Wenn es Kurse oder Veröffentlichungen irgendwelcher Art gibt, bitten wir um Nachricht wo und wie man an sie kommen kann.
Meine Frau Henriette Prissok, arbeitet seit Jahren als Kosmetikerin mit der REVITA-SERIE, die die Fa. LEINBERGER & CO, D 8229 Laufen Mayerhofen /Obb., als physiologische GANZHEITS-KOSMETIK vertreibt.
Ich bitte um Auskunft ob es um eine spezielle Serie oder um die bereits erwähnten Präparate handelt.
Für weitere Informationen wäre ich sehr dankbar.

Mit freundlichen Grüßen

Ihr

Wir möchten besonders Herrn Pavel-Kozak danken für seine fürsorgliche und hilfsbereite Art, mit der er unsere Patientin Andrea Buse aus Georgsheil entgegen gekommen ist.

Unsere kleine Patientin hat sich sehr wohl unter seiner Leitung gefühlt und der therapeutische Erfolg der Behandlung ist in jeder Weise überzeugend.

Gerade bei den Neurodermitis-Patienten, die ja bekannter Massen psychisch fast alle recht auffällig sind, ist eine zwischenmenschliche Verbindung zum Therapeuten notwendig, um den gewünschten Therapieerfolg zu haben. Herr Pavel-Kozak hat es verstanden dieses Verhältnis aufzubauen. Wir sind ihm noch einmal dankbar. Diesem Dank schliesst sich auch die Patientin Andrea Buse an. Wir sind begeistert von dem Therapieerfolg und werden Ihnen weitere Patienten sicherlich in kurzer Zeit zusenden.

Mit freundlichen Grüßen

Dr. med. Strenge

Dear Mr. Kozak,

There is much interest in this country recently concerning your treatments of Epidermolysis Bullosa. There are several patients in this area that are affected with this condition.

I would be very grateful for any information that you could give me regarding treatment so that I can try and get their condition to improve.

Yours sincerely,

Lionel Boxall, M.D.

Sehr geehrter Herr Kosak!

Eine Patientin erzählte mir von Ihren Heilerfolgen bei Neurodermitis. Zur Zeit behandle ich ein 6-jähriges Kind mit generalisiertem Ekzem. Die Mutter möchte mehrere Fahrten nach Saarbrücken mit dem Kind vermeiden. Besteht die Möglichkeit einer stationären Behandlung? Das Kind ist in der BEK versichert. Oder ist es möglich, daß Sie mir Therapie-Prinzipien bekannt geben? Es war unter ~~an~~ anderem von einer Diät die Rede.

Über eine kurze Antwort würde ich mich sehr freuen.

Mit freundlichem Gruß

CONFIDENTIAL DISCLOSURE AGREEMENT

Dear Mr. Kozak:

During discussions with you, our representative indicated that we may have an interest in negotiating an agreement with you concerning a burn formulation (hereinafter referred to as the "Product").

To enable us to evaluate our interest in the Product you have indicated your willingness to provide us with certain information relating to the Product on the following terms and conditions:

1. As used herein "Confidential Information" shall mean any and all proprietary information, know-how and data, technical or non-technical, which relate to the Product and are disclosed to us by you in connection with the aforesaid discussions and evaluations, with the exception only of the following:
 - (a) information that as of the date of receipt by us is in the public domain or subsequently enters the public domain without fault on our part;
 - (b) information that at the time of receipt by us was known to us or any of our affiliates.
 - (c) information that at any time is received in good faith by us or any of our affiliates from a third party, which was lawfully in possession of the same and had the right to disclose the same; and
 - (d) information that we mutually agree in writing to release from the terms of this Agreement.

2. We agree that we will hold in confidence all Confidential Information; that we will not disclose said Confidential Information or permit it to be disclosed by our employees to any unaffiliated third person, corporation or entity and that we will not use, or permit the use of, said Confidential Information for any purpose other than for the aforesaid evaluation without first obtaining your express written permission to do so or except pursuant to a further contractual agreement between us.
3. We also agree that we will notify you promptly after we have had an opportunity to evaluate said Confidential Information of our decision concerning our interest in negotiating a mutually acceptable agreement concerning the Product. In the event that we decide after completing our evaluation that we have no further interest in the Product or in the event that a mutually acceptable agreement concerning it cannot be reached, we agree to return to you, promptly upon your request, all documents, reports, exhibits, and other papers, as well as any remaining samples or specimens, that we may have received from you hereunder. Time required for evaluation is three months.
4. Our obligations under this Agreement shall continue for a period of five (5) years from the date on which Confidential Information is received by us, at the end of which period they shall terminate.

If the foregoing is acceptable to you, please indicate your agreement and acceptance by executing this Agreement in duplicate as indicated below, and return one copy to us.

Very truly yours,

WARNER-LAMBERT COMPANY

Sehr geehrter Herr Kozak,

mir wurde kürzlich über Ihre außerordentlichen Erfahrungen mit verschiedenen Hautkrankheiten, insbesondere die Epidermolysis bullosa, berichtet. Nach diesen Berichten verfügen Sie über therapeutische Möglichkeiten zur erheblichen Besserung bzw. gar zur Abheilung dieses Erbleidens. Da ich selbst mehrere solcher Patienten bisher ohne viel Erfolg betreue, wäre ich sehr daran interessiert, die Richtlinien Ihrer Behandlungsmaßnahmen zu erfahren.

In der kanadischen Presse wurden Sie dahingehend zitiert, daß Sie Ihre Behandlungserfolge allen Ärzten zugunsten der leidtragenden Kranken zur Verfügung stellen wollen. Aus diesem Grunde erlaube ich mir die Anfrage, ob ein Mitarbeiter von mir Ihre Klinik besuchen darf, um Näheres darüber zu erfahren.

In Erwartung Ihrer baldigen Rückantwort und
mit freundlichen Grüßen

December 1, 1982

Mr. Pavel Kozak
c/o Mr. James Karfliss
85 Richmond Street West
Suite 1105
Toronto, Ontario
Canada

Dear Mr. Kozak:

Thank you very much for agreeing to visit us on December 17. We have heard a lot about your treatment of epidermolysis bullosa and are anxious to hear more about it. I have invited six outstanding Dermatologists to join us for this informal exchange of information. As the session on December 17 is scheduled to start at 8:30 a.m. I assume you will be coming here on the evening of December 16. Perhaps we could meet that evening and have a cocktail together.

I envisage the session on the 17th to start with a one hour presentation by you and this will be followed by a question and answer period. This should last for 3 to 4 hours. The National Institutes of Health will reimburse you for your round trip air fare from Toronto, Canada to Bethesda, Maryland and, in addition, provide you with a \$75.00 per diem. The Dermatologists who are coming to this meeting will be staying at the Linden Hill Hotel, which is close to the NIH. The meeting will be held on the NIH campus, and I will arrange to pick you up at your hotel on the morning of December 17.

I am looking forward to seeing you. Please let me know if there is any information you need. At any rate, I will be in touch with Mr. Karfliss a few days before our meeting.

Sincerely yours,

Stephen I. Katz, M.D., Ph.D.
Chief, Dermatology Branch
National Cancer Institute
National Institutes of Health

Dear Mr. Kozak,

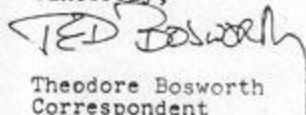

At a recent meeting of the Canadian Dermatological Association, Dr. Lionel Boxall told me of your impressive results treating blistering diseases. He spoke of two Canadians who were significantly improved after visiting your clinic.

We would like to do a story on your treatment for a future issue of Dermatology News. I am aware that you are not, at present, revealing the ingredients of your medications but that you are using a combination of systemic and topical drugs. Could you send us any clinical data on your success rates, the basic premise of your treatment, and any published articles about your clinic? It would be much appreciated.

I also understand you may come to Canada to deliver a lecture on your treatment. If so, please let us know. Perhaps we could cover the lecture or, if not, conduct an interview by telephone.

Thanks very much.

Sincerely,

Sehr geehrter Herr K o z a k !

Wunschgemäß schicke ich Ihnen beiliegend den Bericht
von Prof. Zaun aus unserem "Standesblatt".

Wie ich schon Ihrer Sekretärin am Telefon sagte,
habe ich mich über den Artikel sehr geärgert, da er
wieder einmal zeigt, wie die Schulmedizin auch auf
vielleicht gute "Außenseitermethoden" reagiert und
gar nicht bereit scheint, sich mit ihnen auseinander-
zusetzen-im Interesses des betroffenen Menschen.

Ihre Dia-Schau in Bielefeld im Frühjahr hat mich sehr
beeindruckt, auch die nachgewiesenermaßen anhaltenden
Therapieerfolge ohne längere Corticoid-Anwendung.
Erstaunlich bleibt nach wie vor für den "Schulmedi-
ziner"

b.w.

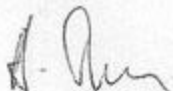

Ihr Erfolg bei etiologisch völlig verschiedenen Krankheiten. Für mich am wichtigsten sind die Neurodermitis-Patienten...

Vielleicht ist es Ihnen einmal möglich, mir Ihre Klinik an einem Samstag zu zeigen, ich würde mir Ihre laufenden Behandlungsfälle gerne einmal ansehen. Vielleicht gelingt es uns ja auch einmal, Ihnen etwas "abzuschauen" und selbst in Ihrer Richtung segensreich zu wirken.

Ich bin jetzt ~~noch~~ erst einmal auf das Ergebnis bei Frau Fiorelli und ihrer Tochter sehr gespannt, sie hat viel durchgemacht und wir waren ziemlich machtlos...

Ich wünsche Ihnen viel Erfolg bei Ihrer Tätigkeit, mit meiner vollen Unterstützung können Sie jederzeit rechnen.

Hochachtungsvoll

Stimate Domnule Kozak,

Vă mulțumim foarte mult pentru recenta Dvs. scrisoare adresată Domnului Dr. Murray, referitoare la cercetarea și studiul bolilor de piele, precum și pentru că v-ați oferit să ne acordați ajutorul Dvs. pentru acest studiu în Ontario.

Am plăcuta misiune să vă comunic că Ministerul Sănătății perfectează o bursă pentru Universitatea din Toronto privind un larg program de cercetări și tratament al bolilor de piele cronice. Acest program va fi condus de Domnul Dr. Colin Ramsay, Șeful Diviziei de Dermatologie din cadrul Diviziei Medicale a Universității din Toronto. În cadrul acestui program, Universitatea va avea la dispoziție toate clinicile universitare precum și alți medici și alte spitale în Ontario.

Conform acestui plan, o primă parte a programului va consta din cercetare și experimente clinice, privind tratamentul maladiei Epidermolysis Bullosa, aplicând programul de tratament pe care l-ați dezvoltat și pe care l-ați discutat cu Domnul Dr. Boxall și alții în timpul recentei Dvs. vizite în Canada.

Vom fi foarte bucuroși să avem ajutorul Dvs. în această problemă și vă asigur că veți primi în curând vești de la Domnul Dr. Ramsay, privind aranjamentele necesare.

Cu stimă,

Dear Mr. Kozak:

I have just been informed that we have been awarded a grant from the Ministry of Health of the Province of Ontario for research into chronic skin diseases.

This research will include the treatment of epidermolysis bullosa using your techniques and I am writing to seek your active involvement in the treatment programme here.

I am about to leave for a two week vacation and I will contact you again on my return.

Yours sincerely,

C.A. Ramsay, M.D.
Professor of Dermatology,
University of Toronto.

Mr. Pavel Kozak
A.M. Sandberg 13
6000 Frankfurt a.m. Main
WEST GERMANY

Dear Mr. Kozak:

In my letter to you of March 19th, 1982 I told you of the grant awarded to the University of Toronto. This grant was awarded by the Ministry of Health of the Province of Ontario for research into chronic skin disease and will include several programmes. One programme will be a clinical trial into the treatment of epidermolysis bullosa using your methods as you discussed with Dr. Lionel Boxall during your visit to Toronto. I know that you expressed to Dr. Boxall your interest in participating in such a clinical trial.

Your assistance and collaboration in the epidermolysis bullosa treatment programme will be most appreciated and I invite you to act as a consultant and an adviser to this programme. This will enable our staff here in Toronto to have training from you on the application of your treatment methods and will thus enable us to benefit from your knowledge of the treatment of epidermolysis bullosa.

The fact that the clinical trial will be carried out at the University of Toronto has the advantage that you will not be required to abandon your clinic and your current studies in Germany.

I will be pleased to hear from you with regard to this proposal since we wish to make arrangements to start the studies as soon as possible.

In order to avoid delay, I am sending this letter in English. I am also arranging for it to be translated and as soon as the translation is available, I will send it to you.

Yours sincerely,

Colin Ramsay

C.A. Ramsay, M.D., F.R.C.P., F.R.C.P.(C).

13 Aprilie, 1982

Va rugăm să răspundeți la
adresa de mai jos:
60 Grosvenor Street
Ste. 309, Burton Hall
Toronto, Ontario, M5S 1B6
Canada

Stimate Domnule Kozak,

În scrisoarea mea din 19 Martie, 1982 v-am comunicat despre bursa acordată Universității din Toronto. Această bursă a fost acordată de Ministerul Sănătății al Provinciei Ontario pentru cercetări în domeniul maladiilor cronice de piele și va include mai multe programe. Unul din programe va fi experimentul clinic al tratării maladii epidermolysis bullosa, utilizând metodele Dvs., așa cum ați discutat cu Domnul Dr. Lionel Boxall cu ocazia vizitei Dvs. în Toronto. Știu că ați exprimat Domnului Dr. Boxall interesul Dvs. de a participa la un asemenea experiment clinic.

Ajutorul și colaborarea Dvs. la programul tratamentului maladii epidermolysis bullosa vor fi foarte apreciate și eu vă invit să participați în calitate de consultant și consilier la acest program. Participarea Dvs. va permite personalului nostru să învețe direct dela Dvs. aplicarea metodelor Dvs. de tratament și în felul acesta ne va permite să beneficiem de cunoștințele Dvs. în domeniul tratamentului maladii epidermolysis bullosa.

Faptul că procesul clinic va fi sub egida Universității din Toronto are avantajul că nu va necesita să părăsiți clinica și studiile Dvs. curente din Germania.

Mi-ar face multă plăcere să primesc vești dela Dvs. în legătură cu această propunere, deoarece am dori să pregătim toate cele necesare pentru începerea cât mai curând posibil a studiilor.

Pentru a evita orice întârziere vă trimit această scrisoare în limba engleză. Deasemenea am aranjat traducerea scrisorii și de îndată ce avem textul tradus, îl voi expedia.

Cu stimă,

Colin Ramsay

Dear Mr. Kozak,

During your visit to Toronto last Fall you kindly agreed to allow any interested Dermatologist visit your Clinic in Germany.

I happen to be on a short visit in Germany later this month, and I would very much like to see the Clinic when I am near Frankfurt on May 4. I shall take the liberty of coming to Alzenau in the early afternoon of that day (Tuesday, May 4) and I hope that this will meet with your approval.

Kind regards, Yours Sincerely,

Dr. H. J. Albers

Mr. Pavel Kozak
A.M. Sandberg 13
6000 Frankfurt A.M. Main
West Germany

Dear Mr. Kozak:

I was pleased to be able to have a telephone conversation with you on May 27th with Dr. D. Dimitriu acting as an interpreter for me. I was glad that we were able to discuss details of the grant made to the University of Toronto by the Ontario Ministry of Health. As you are aware, previously we have both had information provided by the media but our conversation enabled us to establish definite facts about the grant.

As I told you the grant of \$900,000.00 is for the development at the University of Toronto of a number of research programmes into chronic skin disease. The grant was not given for epidermolysis bullosa research alone. However, our first priority is to start a clinical trial on the treatment of epidermolysis bullosa and I stress that this trial will utilize the Kozak method of treatment. A copy of the Ministry of Health Statement about the grant, translated into Romanian, is enclosed.

During our telephone conversation you confirmed that, in principle, you would be prepared to act as a consultant to the epidermolysis bullosa trial. As a consultant, you would be involved in the research and the treatment of the disease both in the acute stage and during remission. We are anxious to further share your knowledge and expertise of the pharmaceutical and other preparations that are used and their methods of application in patient care and also to have you participate in research to determine the importance of the different dietary and pharmacological factors.

In return for this participation during the clinical trial at the University of Toronto, you will be paid from the research grant a consulting retainer fee of \$10,000 (Canadian) per year.

In addition, during short visits, for each day that you are in Ontario participating in this clinical trial, you would be paid at the per diem rate of \$750.00 (Canadian) and as well \$350.00 (Canadian) per day for time spent in travel between Ontario and your clinic. Travel expenses would also be met. Fees for longer periods of time spent in Ontario will be open to negotiation.

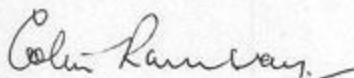

I expect that there will be a need for training of nursing and other staff from Ontario in the application of the treatment procedures. I would propose making arrangements for sending some of our staff to your clinic for this training. Naturally your clinic would be compensated for any expenses directly incurred during the period of training of these personnel.

The advantage to you of the proposal that I have put forward in this letter is that you will be able to continue your work at your present clinic in Germany. Our agreement would not exclude or restrict you from undertaking any other professional commitments.

A Romanian translation of this letter is enclosed. If you wish to reply in Romanian, I will arrange to have your letter translated here.

I will be pleased to travel to Germany to meet you for further discussions on my proposal.

Yours sincerely,

C.A. Ramsay, M.D., F.R.C.P., F.R.C.P. (C)

D-lui Pavel Kozak
A.M. Sanberg 13
6000 Frankfurt A.M. Main,
Germania Federala

Stimate Domnule Kozak

Am avut placerea sa discut cu dvs. in ziua de 27 mai a.c. prin intermediul d-lui dr. D. Dimitriu in calitate de interpret. Am fost bucuros ca am putut discuta detaliile referitoare la subventia acordata Universitatii din Toronto de catre Ministerul Sanatatii din Ontario. Dupa cum stiti, am avut amindoi unele informatii procurate de ziare dar conversatia noastra ne-a ingaduit sa stabilim in mod definitiv unele aspecte referitoare la subventia susamintita.

Asa cum v-am comunicat, subventia de \$900,000 (canadieni) are ca obiectiv realizarea de catre Universitatea din Toronto a unui program de cercetare referitoare la bolile de piele cronice. Subventia nu a fost data numai pentru cercetari privind epidermolysis bullosa. Totusi noi dam prioritate unor experiente clinice privind tratamentul epidermolysis bullosa si accentuez ca acestea vor folosi metoda de tratament Kozak. Anexat se afla o scrisoare tradusa in limba romana a Ministerului Sanatatii referitoare la subventie.

In cadrul conversatiei noastre telefonice, dvs. ne-ati confirmat ca in principiu sinteti dispus sa fiti consultant in experienta referitoare la epidermolysis bullosa. In aceasta calitate veti lucra in cercetarea si tratamentul acestei boli, atat in starea ei avansata cit si in stadiul ei de ameliorare. Sintem nerabdatori sa cunoastem cunostintele dvs. in legatura cu preparatele farmaceutice si de alta natura pe care le folositi, metodele lor de aplicare la ingrijirea pacientului si in acelasi timp, colaborarea dvs. la cercetari pentru a stabili importanta a diferiti factori dietetici si farmacologici.

In schimbul participarii dvs. la cercetarile clinice de la Universitatea din Toronto veti primi anual suma de \$10,000 (canadieni) din subventia de cercetari, acesta ca onorariu de consultant.

In plus, cu prilejul scurtelor dvs. vizite, veti primi \$750.00 (canadieni) pentru fiecare zi de participare la experientele clinice in Ontario si \$350.00 (canadieni) pe zi pentru timpul calatoriilor intre clinica dvs. si Ontario precum si cheltuielile propriu zise ale acestora .. Onorariul pentru perioade mai lungi de stationare in Ontario va fi stabilit de comun acord..

Cred ca va fi necesara o perioada de instruire a personalului sanitar si a unor cadre de conducere din Ontario in aplicarea tratamentului. Asi propune un aranjament de trimiterea unora din aceste cadre la clinica dvs. pentru a fi instruite. Bine inteles ca clinica dvs. va fi recompensata cu cheltuielile facute in perioada de instruire a acestor cadre.

Avantagiile propunerilor pe care le-am mentionat in aceasta scrisoare sint ca veti putea continua activitatea dvs. in clinica dvs. din Germania. Intelegerea noastra nu constituie nici o piedica pentru dvs. de a realiza alte angajamente profesionale.

Anexam o traducere a acestei scrisori in limba romana. Daca doriti sa raspundeti in romaneste, eu voi asigura aici traducerea scrisorilor dvs.

Asi fi incintat sa fac o excursie in Germania sa discut cu dvs. mai mult in legatura cu propunerea mea.

Cu deosebita stima,

C.A. Ramsay, M.D., F.R.C.P.(C)

Re: Jason Hinrichs
Epidermolysis bullosa

Dear Mr. Kozak:

In August of 1982 an organization was formed under the name of Sauk Valley Community Trust Fund, which is a charitable organization, the primary purpose of which is to assist Jason Hinrichs and his family financially. Jason apparently suffers from epidermolysis bullosa and has been and continues to be treated by you.

The Sauk Valley Community Trust Fund, of which I am president, has been trying to make arrangements for you to be able to come to the United States of America in order to treat Jason and other children afflicted with epidermolysis bullosa. Because of legal requirements in the United States, we have been working through a local hospital, Katherine Shaw Bethea Hospital, which is located in Dixon, Illinois, in exploring the possibility that you would be able to come to the United States and treat children such as Jason.

There are, however, certain requirements which would have to be imposed upon you in order for you to be able to come to the United States to treat Jason and other persons. First, we would have to obtain the permission and cooperation of the National Institute of Health. I understand that you already have some familiarity with the National Institute of Health and that you may have some hesitancy to work under its rules and guidelines. Unfortunately, there does not seem to be an alternative to this.

A second requirement is that you would necessarily have to adhere to a research protocol; that is, a specific and scientific plan for the treatment of persons suffering from skin disorders (including epidermolysis bullosa) would have to be developed and followed. This scientific plan, or research protocol, would be developed with input from you, as well as from one or more of several doctors currently researching epidermolysis bullosa in the United States. The research protocol would have to be approved by the National Institute of Health.

Since you are not licensed as a physician in the United States, your treatment of Jason and others would have to be supervised by a physician licensed to practice medicine in the

June 28, 1984

State of Illinois. This supervision would be under the auspices of Katherine Shaw Bethea Hospital, would have to comport with the research protocol, and would be reviewed by the National Institute of Health. An EB treatment center could thus be established in Dixon, Illinois.

The administrators of Katherine Shaw Bethea Hospital in Dixon, Illinois, have expressed a strong willingness to work with you on such a project. The Hospital has, for this purpose, established an Investigative Research Committee, consisting of local physicians. The Hospital has also contacted Dr. Alan Moshell, who is in charge of extra-mural research for the National Institute of Health, who has also indicated a willingness to work with you on such a project.

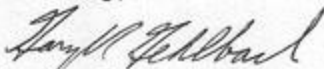

At this time, it would seem appropriate for us to arrange to have you visit with officials from the National Institute of Health and Katherine Shaw Bethea Hospital to explore the implementation of this program, if you are interested. However, before proceeding with arrangements at your convenience for such a meeting, we wish to know whether you would agree to work under the rigorous scientific protocol designed by a group of investigators, under the auspices of the National Institute of Health. Your work and research would also have to be supervised by one or more physicians and reviewed periodically by the National Institute of Health.

Therefore, before we proceed further, please notify the undersigned concerning your willingness or unwillingness to comply with the scientific protocol and supervision. If you are willing, we shall do what we are able to establish an EB treatment center involving you in our community.

An original copy of this letter is being sent to you in English, and we are at the same time attempting to have a copy of this letter translated to Rumanian and also sent to you.

Thank you. We shall expect to hear from you as soon as possible.

Sincerely,

Gary R. Gehlbach

July 21, 1982/uh

Mr. Pavel Kozak
Am Sandberg 13
6000 Frankfurt am Main

Dear Mr. Kozak,

The purpose of this letter is to confirm discussions held in the Frankfurt Plaza Hotel with you and your brother-in-law Mr. Enescu, on July 19th, 1982.

We are pleased that you have agreed to meet us in the next three weeks when you visit the American University people to work out details of your partnership with them in their skin treatment program. Naturally we were disappointed that business pressures from your colleagues at the Vital Clinic prevented you from showing us your clinic in Alzenau-Michelbach, a short distance from Frankfurt. Nevertheless, our meeting was a useful opportunity to discuss proposals for your involvement as a Canadian consultant on the treatment of Epidermolysis Bullosa (herein referred to as "E.B.") according to the method you have been reputed to have developed in this area. Earlier correspondence and discussions have made it clear that this research program has a considerable interest in investigating all useful aspects of the "Kozak Method" in the treatment of E.B. As we mentioned, we will begin to treat patients on August 1, using the "Kozak Method" in Toronto.

The following subjects were fully canvassed at our meeting:

1. Your Toronto Private Clinic Proposal

Your letter of 25.06.82 which followed upon the meeting held in Toronto on 23.06.82 with Dr. Ramsay and myself, confirmed your agreement in principle to your involvement with the research program as a consultant. You went on, however, to suggest that your participation was conditional upon the establishment of a private clinic with 10 - 20 beds where you could provide medical treatment for serious cases of chronic skin diseases. In our discussions, you made it clear that in this clinic you intended to treat other skin diseases besides E.B. (we jointly recognized that

E.B. is a disease of fairly low incidence in the general population and would not justify a full-time facility.)

On July 19th, we confirmed information which you have apparently determined on your own, namely, that the establishment of the private medical clinic such as you have proposed would involve a contravention of Canadian law.

Accordingly, we jointly agreed that the private clinic proposal was not a feasible one.

2. Criteria for your Participation

Notwithstanding the unfeasibility of the private medical clinic proposal we made it clear that it was our desire to continue these discussions with a view to finding a mutually acceptable method to enable the E.B. sufferers of Ontario to benefit from the salutary aspects of the Kozak treatment technique. We suggested that your involvement required that the following 4 areas of discussions needed to be addressed:

- a) Establishment of a professional consulting relationship with the research program in Toronto in respect of the treatment of E.B.. Naturally, you would be a co-author of research papers on the subject.
- b) Degree of your involvement as a consultant to the research program in E.B.
- c) Compensation for your consulting services, for an annual retainer (\$ 10,000), for a per diem fee of \$ 750 to compensate for your services in Toronto and elsewhere and reimbursement of your reasonable out-of-pocket and travel expenses, plus \$ 350 for travel time.
- d) Training at your facility of both medical and nursing staff in the implementation of the Kozak method of E.B. treatment with appropriate payment of the clinic.

During our discussions we elaborated upon each of these areas and look for your views thereon.

3. Kozak Responses to Criteria

Your first reaction to our proposals was that your participation upon an intermittent basis in the research program was not feasible because travel from West Germany to Canada was difficult in the physical sense, and because absences from your present clinic created financial loss and other difficulties to you. In this connection, you emphasized that in your view no treatment was effectively carried on at your German clinic unless you were present. On this basis, you stressed the view that involvement in the University of Toronto research program would require your full-time attendance in Toronto.

4. University of Toronto Clinic

We agreed that any proposal which would not violate Canadian laws and keep the public interest in mind was worthy of our serious consideration. You advanced the suggestion that a clinic under the auspices of two dermatologists be established in Toronto with access to hospital for admitted patients. Under this arrangement you would work in this clinic on a full-time basis, and operate as a partner with the dermatologists directing it. You impressed upon us that this "attractive proposal" would be made to us only upon this one occasion because an offer upon these lines was open to you from an unnamed American university clinic.

In making this fresh proposal you expressed the recognition that it suffered from the same impracticalities as the private clinic proposal so far as Ontario is concerned. We have confirmed your understanding that if the services rendered by you in the clinic are in the nature of medical treatment, Ontario law would be contravened. You alluded to the fact that in the American situation, the gross revenue of the proposed university clinic would be divided equally among you and the two dermatology professors. In this regard, we pointed out to you that ethical considerations and the provisions of the Ontario Health Insurance Plan would stand in the way of such an arrangement in Toronto. In our jurisdiction, it is not possible for fees for medical services to be split with non-physicians. This situation might be different from that in the United States where medical services are largely privately funded.

5. Affiliation with an American University

As mentioned above, you have indicated to us that in August 1982, you will be cementing your agreement with an American university (in a location which you were not prepared to name), to establish an arrangement of the nature described. In effect, you have said that you expect to be emigrating to the United States to further your research efforts in E.B. and in other chronic skin diseases under the auspices of a university clinic.

This subject, which had not been mentioned in any previous correspondence or meeting, sparked Dr. Leblanc's proposal that your residence in the U.S. might make your intermittent attendances as a consultant to the Toronto research program feasible.

You agreed that under those circumstances, periodic consultation might indeed be workable but you were not prepared to commit yourself before discussion with your American colleagues. You left us with the assurance that you would raise this subject at the August meeting in the United States and contact us further in this connection.

6. Financial Considerations

You agreed that the financial demands expressed in your letter of 25.06.82 namely \$ 6,000 monthly for 2 hours daily, were no longer relevant since you will not be in Toronto on a full time basis. The proposal set out in Dr. Ramsay's letter of 16.06.82 is still open, and its reasonable nature has been amplified by the discussions we have had with you.

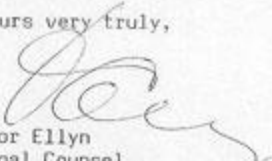

7. Summary

On behalf of the research program, set to commence on August 1, 1982 we continue to express the hope that some mutually acceptable arrangement which will benefit the E.B. sufferers in Ontario and elsewhere will be found.

The research program will proceed to investigate which elements of the Kozak method for treatment of E.B. add new dimensions to the current techniques for the care and management of this disease.

Your advice on the feasibility of your participation under the new proposal is awaited.

Yours very truly,

Igor Ellyn

Mr. Pavel Kozak
c/o Mr. James Karfliss
85 Richmond Street West
Suite 1105
Toronto, Ontario
Canada

Dear Mr. Kozak:

Thank you very much for agreeing to visit us on December 17. We have heard a lot about your treatment of epidermolysis bullosa and are anxious to hear more about it. I have invited six outstanding Dermatologists to join us for this informal exchange of information. As the session on December 17 is scheduled to start at 8:30 a.m. I assume you will be coming here on the evening of December 16. Perhaps we could meet that evening and have a cocktail together.

I envisage the session on the 17th to start with a one hour presentation by you and this will be followed by a question and answer period. This should last for 3 to 4 hours. The National Institutes of Health will reimburse you for your round trip air fare from Toronto, Canada to Bethesda, Maryland and, in addition, provide you with a \$75.00 per diem. The Dermatologists who are coming to this meeting will be staying at the Linden Hill Hotel, which is close to the NIH. The meeting will be held on the NIH campus, and I will arrange to pick you up at your hotel on the morning of December 17.

I am looking forward to seeing you. Please let me know if there is any information you need. At any rate, I will be in touch with Mr. Karfliss a few days before our meeting.

Sincerely yours,

Stephen I. Katz, M.D., Ph.D.
Chief, Dermatology Branch

Dear Mr. Kozak:

Mr. Tony DeGabriele has kindly consented to carry this letter to you in Germany with the hope that he can convince you to respond to the offer which I proposed to you in my letter of June 16th, 1982.

As you are aware the request for a private hospital cannot be considered further, however I am very willing to discuss the original terms of the offer and make reasonable changes if necessary.

There continues to be much interest in the use of your treatment methods for epidermolysis bullosa at the University of Toronto. As I noted in my letter of June 16th, 1982, a copy of which is enclosed, we wish to obtain your co-operation in our clinical trial of the methods that you use in epidermolysis bullosa.

It would be beneficial to have your participation in our research programme on the treatment of epidermolysis bullosa and I look forward to your early response to this letter.

Yours sincerely,

C.A. Ramsay, M.D., F.R.C.P., F.R.C.P.(C).

Dear Miss Burke:

I am pleased to advise that I have approved your request of August 5th for financial assistance towards the cost of treatment from Dr. Kozak, provided certain conditions are met.

These include:

- (1) This Department be provided with verification from the Government of West Germany that Dr. Kozak's clinic is registered and accepted as a hospital/clinic by them.
- (2) That the Department is provided with a "before" and "after" report from your dermatologist.
- (3) That a follow-up report within one year be provided by your dermatologist to the Department.
- (4) This approval is for a maximum of 3 months' care.

Although your request was made to the Health Services and Insurance Commission, further contact should be with:-

Mrs. Lorraine Hartley
Supervisor of Out-of-Province Claims

Dear Mr. Kozak:

Thank you for your letter that I received on August 1st, 1986.

Since my last letter to you in 1982 we at the University of Toronto have carried out a study of the treatment of epidermolysis bullosa based on the information that you gave to us on one of your visits here. This study has resulted in several publications in the medical literature and I enclose copies of these publications for you.

I would be interested to hear your views on further planned and possibly controlled studies that you think should be carried out to further advance our knowledge of the disease epidermolysis bullosa. I am sure you will agree that such carefully controlled studies are essential in order to put our treatment in its correct perspective.

Yours sincerely,

December 15th, 1986

Metodo Pavel Kozak, S.A.
Cal Deu
Cabanellas, (Girona)
S P A I N

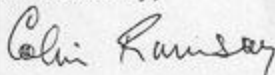

Dear Mr. Kozak:

Thank you for your letter of November 14th, 1986 which I have now had translated. As you know the therapy that we used in treating our patients with epidermolysis bullosa was that detailed by you when you visited Toronto in 1981. I trust you will agree that we have shown that our patients did improve as we reported in our paper published in the International Journal of Dermatology.

In your letter you say that the information that you gave to us was for the treatment of epidermolysis bullosa simplex and that we "have applied it in treating all forms of E.B." However it is my recollection and that of my colleagues that the treatment you discussed with us was that used by you in all forms of epidermolysis bullosa. There is nothing in the notes that were taken of your presentation at that meeting that suggests the treatment should only be applied to patients with epidermolysis bullosa simplex.

It would be advantageous if you would put in writing your original thoughts on the treatment of epidermolysis bullosa and how these have now changed. If you do vary your treatment for the different forms of epidermolysis bullosa perhaps you will let me know the different types of therapy that you employ. We do need more details of what you have in mind for the treatment of epidermolysis bullosa so that we can construct a firm plan for future research. Such a carefully planned study will enable everyone to properly assess the treatment of a skin disease which is often resistant to therapy. I trust that you will agree with this approach.

Yours sincerely,

C.A. Ramsay, M.D.

Dear Ms. Burke,

This is in response to your revised expense claim dated November 13, 1986, which you submitted in reference to your attendance at the Residencia Caldeu, Cabanellas, Gerona, Spain.

This letter is to advise that your request is approved as per the expense statement.

I understand that all arrangements have been made through Mrs. Lorraine Hartley of the Department.

I trust that your treatment to Dr. Kozak's Clinic will be successful.

Yours very truly,

Ronald S. Russell, C.D.

P.O. Box 160
Georgetown, Ontario
L7G 4U5

Dear Mr. Martens:

Thank you for your letter to the Honourable David Peterson regarding the desire of Mr. Pavel Kozak to come to Canada. Mr. Peterson has referred your letter to me for reply.

As you know, my Ministry has provided funding to the chronic skin disease research and treatment program under the direction of Dr. Ramsay at the University of Toronto. This program included research into the use of Mr. Kozak's methods of treatment for Epidermolysis Bullosa.

I understand that Mr. Kozak has written to Dr. Colin Ramsay, Professor of Dermatology at the University of Toronto, several times during 1986 and that Dr. Ramsay has replied to his letters, most recently in December 1986.

If Mr. Kozak desires to come to Canada to discuss the results of his work with Dr. Ramsay, it would be more appropriate for him to make arrangements for this visit directly with Dr. Ramsay, rather than through the Government or Ministry of Health.

Yours very truly,

Murray J. Elston, M.P.P.

Dear Dr. Kozak,

RE: Ms. Gloria Burke
26 Lyons Ave., Apt. #3
Halifax, Nova Scotia
B3P 1H5

Ms. Burke who is presently receiving treatment at your Clinic telephoned last week stating that you required an advance payment from the Nova Scotia Department of Health for her treatment and hospitalization during the Month of February 1987.

The telephone connection was extremely poor and we were unable to interpret correctly the name and address of the Bank where you wanted the cheque to be sent. To expedite payment, it would be appreciated if you would forward your billing to my attention at the beginning of each month with an estimate of the costs for Ms. Burke's treatment for the upcoming month. Payment would be made upon receipt of your statement.

We would also appreciate receiving a receipted account when you have received payment.

To alleviate concerns on the part of Ms. Burke and to assure you of payment, we wish to advise that the Honourable Minister of Health has approved the entire costs for Ms. Burke's treatment at your Clinic.

We trust the above meets with your approval.

Yours very truly,

Mrs. Lorraine Hartley, R.N.

Dear Mr. Degabriele:

As a result of your meeting with the Department of Health, the Department is extremely pleased with the progress of Epidermolysis Bullosa patients being treated by Dr. Pavel Kozak's methods.

We are impressed by the results expressed in Dr. James McGillivray's report on Dr. Kozak's Clinic in Spain.

You have expressed the need to have Dr. Kozak come to Canada to do follow up visits on Epidermolysis Bullosa patients.

It is recommended that the most expeditious avenue to follow is to have Dr. Kozak's visits sponsored by a private group or organization that has already expressed an interest to do so.

It was a pleasure meeting with you and Miss Burke.

Yours very truly,

(Mrs) Lorraine Hartley, R.N.

Dear Mr. Kozak:

The Canadian Foundation for Chronic Skin Disease is arranging a clinic for people suffering from skin disease.

This clinic is to be held on October 21, 1987 at the office of Dr. James W. McGillivray in Collingwood.

The Foundation would be pleased if you would attend this clinic as an observer and consultant.

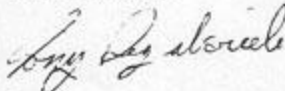

We are also pursuing the possibility of meeting in Halifax, Nova Scotia with some doctors who have expressed an interest in your work.

Please accept this letter as our formal invitation to participate in this clinic as stated above. Travel and accomodation costs will be born by the Foundation.

An honorarium for your participation will be provided by the Foundation.

Yours very truly

RE: Gloria Burke 86-1531

Dear Mr. Martens,

I saw Gloria today on August 31st, 1988. She is this very pleasant 30 year old lady with Dystrophic Epidermolysis Bullosa. She was in Spain with Mr. Kozak in Spring 1987 and she came back in Nova Scotia on May 13th, 1987. After 16 months of her return she is certainly objectively better then when she left Nova Scotia. So I think that overall her stay in Spain was valuable. She still has opened sores but her overall condition is significantly better. She was four months all together at Mr. Kozak's clinic and she still follow a specific diet with different creams.

I am following actually another patient in the Moncton area whom you might know, his name is Mr. Keir Colpitts who also has a very severe Dystrophic Epidermolysis Bullosa. Keir was looking forward to see if Gloria would be improved with her stay in Spain and we might start doing arrangements to see if Keir can not go in Spain at his convenience.

I hope that these informations are helpful to you and I wish you a nice day,

Sincerely,

DICTATED NOT READ

Dear Mr. Kozak:

Re: Hospital Accreditation Instituto Pavel Kozak

One of the key mandates of our Foundation is to assist skin disease sufferers in receiving proper treatment for their ailments, particularly epidermolysis bullosa and scleroderma.

Your treatment is, to the best of our knowledge the only one available anywhere that provides relief and enables sufferers to function normally again. There are many sufferers in Ontario and if this treatment were available here in an accredited hospital our Ontario Hospital Insurance Plan would pay for it. Since this treatment is not available here in Ontario the potential patients are looking to go to the Instituto Pavel Kozak for treatment provided the money to pay the costs can be found.

For out of the Province treatment, the Province of Ontario regulations require that "the hospital that supplied the care and treatment is licensed or approved as a hospital by the Governmental hospital licensing authority in whose jurisdiction the hospital is situated."

Our Foundation has very limited resources and at the present time is unable to send people for treatment. We are therefore encouraging you to obtain the required hospital accreditation or designation so that we can approach the Ontario Ministry of Health and request that the Ontario Hospital Insurance Plan assume all or a large portion of the cost of the care at your Institute.

This would be a tremendous benefit to the skin disease sufferers and work toward a wider recognition of your successful treatment of Chronic Skin diseases.

If this were achieved the increase in services required to accomodate the out-of-Spain visitors would certainly provide a substantial economic benefit to your community and to Spain.

We trust therefore that you will make every effort to obtain the proper accreditation and designation for your Institute.

Yours very truly,

Canadian Foundation for Chronic
Skin Disease

Cher Monsieur,

La famille de LABARRE a décidé de vous confier leur enfant
Camille, née le 05/11/87, qui présente une épidermolyse bulleuse dystro-
phique récessive.

Depuis le mois de mars 1988, la croissance de l'enfant est rela-
tivement satisfaisante, il y a peu de problèmes de surinfection, mais l'at-
teinte des mains devient préoccupante.

Je vous serais gré de m'indiquer les traitements que vous formu-
lez pour le suivi de l'enfant ici à Bordeaux. J'ai eu l'occasion de discu-
ter récemment avec le Docteur ATHONTON qui était venu accompagner une en-
fant anglaise dans votre Centre et qui a été très favorablement impression-
né par les résultats que vous obtenez.

Je vous prie de croire, Cher Monsieur, à l'assurance de mes
sentiments les meilleurs.

Dear mr. Kozak,

As mr. Doldersum, father of Guido Doldersum, born 30-04-1985, living in Enschede, The Netherlands, will have told you, we have a request to you. From literature we are aware that you have already had many discussions with dermatologists about the treatment of epidermolysis bullosa. Opinions differ very much and as social insurance (and in some aspects a private - additional - insurance) we find difficulties in determining the true position and value of the treatment you give to epidermolysis patients in your Spanish Clinic. Already we offered to pay for the visit of any respectable Dutch dermatologist to your clinic if he/she was to be well informed about your procedures.

Now, it seems in the past the problem of information was a major obstacle.

For that reason we would like you to state your intention of being prepared to receive a dermatologist and to inform him/ her of the principles and practice of the treatment you give to epidermolysis patients. In this way we would receive an objective impression about the treatment and could be tried to transfer a mayor part of the treatment and pharmaceutical production of drugs to Holland. This would according to Dutch regulations - improve the chances of obtaining financial coverage for the treatment of Guido Doldersum. From a medical point of the view it would be convincing if an open discussion about your theories, as is usual in the medical field, could be possible.

So please, as a sign of your willingness to receive a dermatologist, sent bij our Sick Fund, either send/fax us a statement using phrases of the above mentioning nature or countersign and return this telefax (0731-74-455265) directly or by mail.

This give us certainty about which steps to take next in this regard.

We would be very happy to hear from you,
yours sincerely,

W.H. van Harten,
medical adviser Sick Fund Twente.
